

Hi XYZ,

During the winter, dogs are stuck inside, making them more likely to sit around and chew on their toys. When spring starts peaking around the corner, many of those toys are in dire need of replacing.

Spot from Ethical Products has new toys to meet all your dog's needs:

- The **Furzz™** plush toys feature realistic-looking fur, stuffing-free bodies, and a sewn-in squeaker to keep dogs occupied for hours. Their flip-flopping bodies are fun for dogs to carry and toss around. Seven characters are available in two different sizes.
- The **Red Alert™ Dual Texture Bone** is a durable Nylon bone with a more flexible, “meatier” rubber accent that dogs will love. They come in two flavors, Beef and Turkey, and three sizes. Each bone contains a red core safety indicator to alert you when it's time for a new one.
- The **Bam-bones™** are a long-lasting and durable “bone” made from natural, renewable bamboo fiber. They satisfy a dog's natural chewing instinct, exercises their jaw muscles, and help clean teeth. Available in a variety of sizes and two delicious flavors: Chicken and Bacon.

Would you be interested in reviewing one of the above products and featuring it in a post or roundup?

Best,
Sam (with signature)
